Software Engineer | JavaScript (TypeScript) | React | Redux | Angular | Next.js | Node.js | Exploring Web3 | Lifelong Learner
Nairobi, Nairobi County, Kenya

Summary

Streamlining my career path via technology through practical knowledge. Passion is overrated; it's more than a passion to me. Computer Science, as a profession, is where my true ambitions and drive intersect with my purpose and impact.

My sleeves, rolled up, ready to get my hands dirty and push the limits of innovation to address the world's most important challenges. I am striving for execution excellence while being direct, humble, collaborative, and inclusive of diverse perspectives. I currently build and provide crucial insights on User Interfaces (UIs), User Experiences (UX), RESTful APIs & Database Management Systems (DBMS) using JavaScript and its frameworks/libraries.

Taking part in requirements gathering, rapid prototyping, modelling business logics and driving projects to successful and impactful deliveries is my ultimate career goal. I believe having diverse knowledge & skills in Actuarial Science and Computer Science will be pivotal in shaping the global tech space and dismantling the status quo. Join me in this journey as I learn, explore and innovate in the ever evolving tech landscape.

Experience

Upwork

Freelance Software Engineer
March 2025 - May 2025 (3 months)
Nairobi County, Kenya

SYSCRAFT LIMITED

Software Development Intern
May 2023 - August 2023 (4 months)
Westlands, Nairobi, Kenya

- Integrated business modules on Odoo using ERP system customization techniques, improving operational efficiency for clients.
- Developed a philanthropic activity tracker software using React + Firebase for a client, streamlining their donation management process and enhancing transparency.
- Built and refined my portfolio using React, utilizing GitHub, showcasing my growing technical skillset to potential employers.

Education

The Catholic University of Eastern Africa

Bachelor of Science, Actuarial Science · (May 2019 - October 2024)

freeCodeCamp

Backend Development · (February 2024)

Alison

Computer Science · (May 2023)

Sololearn

Front-end Web Development · (February 2023)
